Micronesia

**Overall Risk Score: 47**

**Risk Level: medium**

This score is a composite of the four domain scores discussed below, which are weighted and combined to produce the overall country risk score. Each country is given a score from 1 to 100 for each domain and for the total bribery risk. A higher score indicates a higher risk of business bribery. Assessments of whether a given domain score is “good” or “poor” are made relative to all other jurisdictions within that domain.

1. **Business Interactions with Government:** Micronesia receives a medium score of 39 in this domain, based on a medium degree of government interaction, a low expectation of bribes, and a medium regulatory burden.

2. **Anti-bribery Deterrence and Enforcement:** Micronesia has no data for this domain. It receives a medium score of 44 based on a gradient-boosting imputation algorithm.

3. **Government and Civil Service Transparency:** Micronesia receives a poor score of 81 in this domain, based on poor governmental transparency and poor transparency of financial interests.

4. **Capacity for Civil Society Oversight:** Micronesia receives a medium score of 31 in this domain, based on a very high degree of media freedom/quality and a low degree of civil society engagement.

---

**TRACE Bribery Risk Typology:**

**Democracy with simpler economy**

This group is typified by stable democratic government and an economy largely built on the export of a limited number of simple products.
